

Two way stretch top cover with taped  
 Infection control seams and side skirts

## premium8digital

The premium8digital is a digitally controlled mattress replacement system for the treatment and prevention of pressure ulcers. Ideal for hospital or aged care, the system offers many intelligent features at an economical price.

The 21 cells provide a full 200mm suspension and alternation system for the patient.

Use only with the consent and supervision of a suitably qualified health professional.

### control unit

cell in cell technology	✗
side buffer	✓ (optional)
number of cells	21
static head cells	✓
CPR function	pull tag
anti kink hosing	✓
micro air loss feature	✗
positioning handles	✓

## product specification

Other quality features include an anti-slip base, positioning handles and a manual transport feature that allows the system to continue to suspend the patient without power to the control unit.

A heavy duty quick release zipper, dual cell press studs as well as a fully sealed top cover with infection control side skirts make the premium8digital an ideal choice.

### Quick Facts

- Mattress replacement system
- Care level - High Risk
- Digital control unit with non-continuous operation
- Quick release connectors for easy connection
- Vapour permeable, 2 way stretch top cover for maximum shear and friction protection.
- Static head cell section for patient support

### top cover

top cover material	PU coated 2 way stretch nylon
attachment type	quick release zipper
Infection control side skirts	✓
seam joining	tape sealed

### general

risk category	high risk
maximum user weight guide	180kg
carry bag included	✓
